

I am close to graduating from the Interactive Media Management Program at Algonquin college. Throughout the program I have learned to not only **design and develop** but to match **accessibility standards** and design with **aesthetics**. I can now proudly say that I am capable of not just understanding but doing an **end-to-end design**. Which involves **rigorous testing** after the problem is identified until the final design is delivered.

Having worked within the IT industry for **over one year**, I have developed a wide range of skills that could meet various roles in the industry. In my previous role as an **Assistant System Engineer Trainee** for **TATA Consultancy Services**, I have developed and enhanced various skills, including but not limited to **problem-solving, troubleshooting, communication** in terms of verbal and written, **customer services, client handling** and **critical-thinking**. I was responsible for **testing and providing support** (technical as well as basic troubleshooting) to the clients.

Additionally, I have developed inquisitiveness and perseverance while working on IT projects during my **graduation in Computer Science**. It involved showcasing and reporting using various **word processors** and **spreadsheets**.

I am currently working as a **Media Designer and Team Lead** with “National Children’s Botanical Garden of Canada” where I am responsible for updating their website, creating a youtube channel and a motion graphic video along with two more people in my team. I am also building my portfolio which is still in progress however here is a link to where it has reached so far. <https://garvishthaarya.wixsite.com/garvishtha>. I am also attaching my pdf portfolio.

I am always amazed by the fact that no matter what type of project or design I work on I always get to learn something from it and how it helps in the next project.

I would relish the opportunity to bring this level of success to the company. If you would like to get in touch to discuss my application and schedule an interview, you can contact me via phone [+1 613 (890) 1085] or email [garvishtha.arya@gmail.com].

Thank you for your time and consideration.

I look forward to hearing from you soon.

Yours sincerely,
Garvishtha
